Minutes for Meeting March 12th
Meeting: Monday at 2:00 PM

Attendance:
Joe Reimer- Present
Kartikeya Shukla- Present
Ryan Kittleson- Present
Vighnesh Iyer- Present
Brian Doyle- Present

Brief Summary of Discussion:
Discussed the process of steps we need to complete in order to meet the requirements for the alpha release this upcoming Friday (pending potential extension by spring break w/ poll). Much progress has been made, though visual improvements must be made in order for us to feel more comfortable with the release. We need functionalities including requiring a user to be logged in to be able to upload or download files. The login page, file uploading, and file downloading, are all working to a reasonable extent, and we shall look forward to making further advancements this week.

Details About Accomplished Tasks:

Kartikeya Shukla- Allowing uploading of different file extensions(pdf, png, etc.) to our/same database.
Ryan Kittleson- Finished learning Django, aided in group development of project base.
Vighnesh Iyer- Populating Database with Files Achieved, full completion of Django Learning.
Joe Reimer- Additions to Dashboard pages looks.
Brian Doyle- Finished Setup of pages, uploading of pdfs to our/same database, and downloading of files from site.

Tasks to be Completed Before Next Meeting:(Or Work on through next meeting)

Alpha Release Requirements Must Be Completed Before Friday

Kartikeya Shukla- Production of Youtube video and reviewing code. Securing Login.
Ryan Kittleson- Production of Youtube Video to meet requirement.
Vighnesh Iyer- Production of Youtube video for release, along with creating the release and reviewing code. Securing Login.
Joe Reimer- HTML additions, looking into using bcrypt for password protection reasons.
Brian Doyle- Disallow users from seeing the dashboard page until they are logged in.

REQUIREMENTS FOR ALPHA RELEASE

Develop Alpha Release: Develop the alpha version of your project that enables your user story/stories

Deploy Alpha Release: Deploy the alpha version of your project for your alpha testers

Developer Documentation: Write documentation sufficient to on-board a new developer into your project

Help Wanted Issues (Individual): Create an issue in your area of the project for an outside developer to complete

YouTube Video: Create and submit a YouTube video of your running software

Practical Objective

Objective: Develop and release the alpha version of your project that enables your user story/stories with no critical bugs. The release must be accessible to a non-technical user.

Criteria:
1. As a non-technical user I was able to easily run/start the software
2. As a technical user I was able to use this release for the user story/stories of this project
3. The "help wanted" tasks have an appropriate scope and are clearly described

Note that the last criteria assesses individual work. If the team has a low score in this criteria the course staff will determine which task(s) caused the low score. If the project has great scores for the first 2 criteria the team members with appropriate and clear tasks will still meet the practical objective while the members with the offending tasks will not.

Possible Schedule for the Upcoming 10 Days

Python Coded html files- **BY MONDAY, March 12th.**

Uploading and Downloading (Including being able to use PDFs)- **BY TUESDAY, March 13th. COMPLETED AS OF MARCH 11th**

Testing done by at latest, **Wednesday/Thursday, March 14 and 15.**

Clarify collaboration components of the alpha release vs. the beta release.

Salt and Hash, password encryption, Bcrypt
Attempting to upload to a site, testing.
Another YouTube video, and another ReadMe (Ryan)
Visual Modifications to html pages.
Disallow users from seeing the dashboard page until they are logged in. (Brian)
Upload and Download Views.
